The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art (Figures 7 and 8) in view of JP 10-318142 (Figure 6).

The admitted prior art substantially discloses the claimed invention except for the insert portion and the clamp. JP '142 discloses insert portion 17 and the corresponding clamps (unnumbered) which receive the insert portions, and to provide the admitted prior art with this structure thus would have been obvious, to better secure the cover.
